## Best Condition

G

- No discomfort Is felt.
- Self-healing system is getting stronger with treatment.
- Minimal preventive maintenance is enough to keep in this condition.
- Much better tolerance to negative effects of food, work, exercise, emotions, environment and etc

and etc. Self-Healing Threshold-

C

- Severity and frequency of symptom vary depending on factors of food, work, exercise, emotions, environment and etc.
- Tolerance to the above factors gets better with treatment and proper managing them alone can make self-healing system kick in...
- Self-healing system gets better with treatment.
  - Responsible organ responds better to the treatment.

 Severity and frequency of symptom vary depending on factors of food, work, exercise, emotions, environment and etc.

- Self-healing is about to kick in.
- Responsible organ still responds to the treatment.

В

- Severity and frequency of symptom vary depending on factors of food, work, exercise, emotions, environment and etc.
- Tolerance to the above factors gets worse.
- Self-healing system gets weaker with no treatment.
- Responsible organ still responds to the treatment.

D

- Severity, intensity, and frequency of symptom and pain are greatly affected by food, work, exercise, emotions, environment, and etc.
- Self-healing system still seems to have ceased to work.
- Although responsible organ still responds to the treatment, symptom does not seem to get better unless the treatment is very powerful.
- Usually patients abandon acupuncture treatment and get to seek surgery or other remedies, which would result in responsible organ's catastrophic failure.

Severity Threshold

- Severity, intensity, and frequency of symptom and pain are greatly affected by food, work, exercise, emotions, environment, and etc.
- Self-healing system still seems to have ceased to work even with treatment.
- Although responsible organ still responds to the treatment, symptom does not seem to get better unless the treatment is very powerful.
- Usually patients abandon acupuncture treatment and get to seek surgery or other remedies, which would result in responsible organ's catastrophic failure.
